ABOUT US

Four decades of sheet metal, one family

G.K. Industries grew out of **Promax Industries**, founded in **1984** by the **Late Shri T.N. Sharma**. From its first year the company supplied sheet metal to **Uno Minda**, and it remains one of Uno Minda's oldest suppliers.

We run progressive tools on automated presses with an in-house tool room, and finish parts in our own **Electroplating Zinc Alkaline Barrel Facility** at Ballabhgarh. Every press is connected to Leafnet IoT, with lot-level traceability on every part.

KEY CUSTOMERS

Uno Minda Group · Pricol Limited · NS Instruments India

Tier-1 automotive and instrument manufacturers across NCR and India.

Live Leafnet board: every press, operator and part in real time

Stainless Steel Lock Washers (Push Nuts)

SPECIALIST

Self-locking push nuts that press onto a shaft or stud and hold without threads. The locking fingers are formed in the die for a consistent grip, lot after lot.

- Stainless steel, also CRCA and spring steel
- Flat and domed (cap-style) profiles
- Multiple shaft diameters, made to drawing
- Progressive-die production for high volumes

Samples and PPAP support on request

Component range

Sheet Metal Components

Stamped, drawn and formed parts

Washers

Flat, star, wave and lock washers

Terminals

Brass and plated steel, with pin assemblies

Insulation Parts

Bakelite, fabric bakelite, glass epoxy

Gaskets

Flat ring gaskets and shims

Brackets

Mounting brackets and support plates

MATERIALS

CRCA · Spring Steel · Stainless Steel · Brass · Copper · Aluminium · Phosphor Bronze · Glass Epoxy · Bakelite · Fabric Bakelite

Capabilities & infrastructure

Power press stamping

Progressive, blanking and forming dies on mechanical presses.

Forming in the die

Forming, coining and flanging built into the tool.

In-house tool room

Die building and maintenance in-house.

Zinc alkaline barrel plating

Blue, yellow and black trivalent passivation.

Spot & projection welding

Sub-assemblies with repeatable weld positioning.

Lot-level traceability

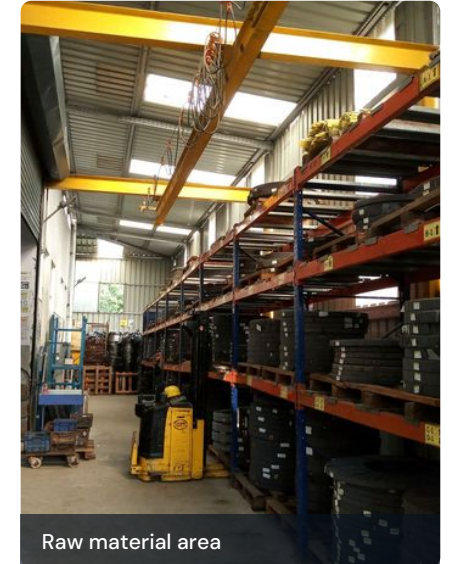

Raw material to dispatch, with 4M documentation.

Press shop

Tool room

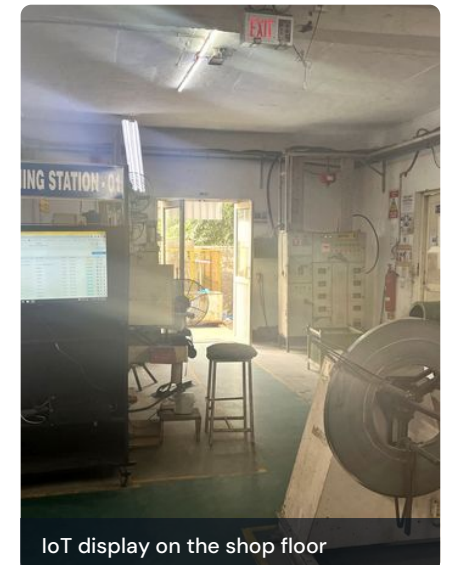

Raw material area

FIFO racks

DOJO training room

IoT display on the shop floor

Built for zero defects

IATF 16949 certified since 2017

Quality system aligned to automotive requirements.

MACE 4M discipline

Man, machine, method, material changes documented.

Written SOPs for every operation

Consistent across shifts and operators.

Dedicated visual inspection area

Separate inspection stations before dispatch.

Operator training in the DOJO room

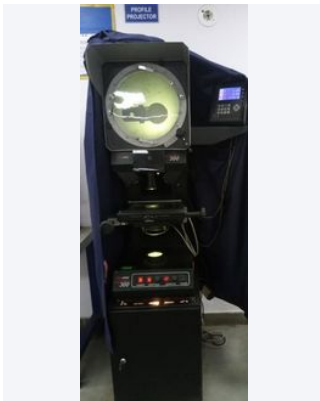

Trained before running a machine.

Visual inspection area

NS Instruments India team from Japan at our press line

Profile projector

Hardness tester

OPEN FOR AUDITS

We welcome customer audits and plant visits. Processes, SOPs and live production data from Leafnet IoT are open for review, and every lot is traceable from raw material to dispatch.
